To Amador County Planning Commission,

We are Mark and Leslie Garrett, we moved to 14812 Muller Road almost a year ago. We are the last house/driveway at the end of the paved road on Muller and would be extremely impacted by this winery in a negative way!

We are deeply concerned about the proposed winery and all that would come with it...starting with:

Drunk drivers driving thru our neighborhood or up my drive way because they are drunk and confused on the way out. People speeding, Google map sending people thru our private roads. There are many residents that enjoy walking with their children and pets. There are no sidewalks...there are many hills that make blind spots...it would be very unsafe for the residents.

Infrastructure that is need to provide access for customers and emergency vehicles, major construction that would be extremely disruptive.

12 Events a year, 1 a month, Drunk people accessing the neighborhood, light pollution, noise pollution, unwanted garbage. I don't want lighting, loud music and voices of 100/200 party goers whooping it up.

We purposely moved to a private safe quiet rural neighborhood! It is extremely disturbing to us! A winery is a business bring unwanted traffic, drunk drivers, individuals who may not be thinking clearly and have no concern for the residents, our property and our safety.

We strongly recommend that this proposal be denied for all the reasons listed above as well as the concerns brought to your attention by our HOA and individual residents!

Please a NO on this unwanted winery!

Mark and Leslie Garrett
