On May 29, I sent the letter below to the Planning Commission for your consideration. Since then, I found out that Google Maps directs people going to this winery through our development. We are not in favor of public traffic traveling on our private roads (kept up and paid for by our residents) to get to a place of business -- unless we are able to get help with keeping them up.

Thank you for taking our opinion into consideration.

John and Judy Albro

Planning Commission  
Amador County

This location is on Muller Road and is very close to Willow Creek Road. I drove by 14920 Muller Road, and could see no reason for any traffic to come through the WCRE development. That end of Muller Road is badly in need of repair, and the tasting room guests would only have a short way to drive on that road if they came by way of Willow Creek Road. If they turn from Carbondale Road, however, it would take much longer to get to the tasting room, plus cause lots of stress, wear, and tear on their vehicles ---and it's certainly not a comfortable drive!! Another point I wanted to make: For years we have been talking about the Muller Road extension and how we could afford to keep it up. We have asked residents who live on the extension to chip in and help, but it always fell flat. We have had a few kind neighbors over the years, grade it with their tractors and toss a little gravel which we were thankful for, but it's a mammoth job to take care of our private roads and also that extension. Maybe the winery, once established, could help with that problem???

My husband and I have no objection. Heck, we'll have a hops field with tasting room at one end of our development, and a wine tasting room at the other. Who could ask for more?
