**Hazardous Waste Inventory Information** - The total quantity of hazardous waste generated per year. Complete the above table for all hazardous waste inventory (e.g., used oil, used parts cleaning solvent, used oil filters, waste paint, etc.). Use the Definitions of Treatment and Disposal Methods described below.

**Recycled on-site** - The facility takes the waste or any constituent of waste, treated or not, and reuses it on-site or ships it off-site as an Excluded Recyclable Material.

**Treated on-site** - The facility employs any method, technique, or process which changes or is designed to change the physical, chemical, or biological character or composition of the hazardous waste or any material contained therein, or removes or reduces its harmful properties or characteristics for any purpose including, but not limited to, energy recovery, material recovery, or reduction in volume. (e.g., pH adjustment, evaporation, precipitation, filtration, distillation, compacting, etc.) If, after treatment, the material is reused at the facility, the "Recycled on-site" box in the waste inventory table should be checked.

**Shipped off-site for recycling/treatment/disposal** - The facility sends the waste, or any hazardous treatment residual, to an off-site permitted treatment, storage, or disposal facility (TSDF).

*Note: Depending on how a waste or its constituents are recycled and/or treated, more than one treatment/disposal category may apply. All applicable boxes of the waste inventory table should be checked.*
